

Challenges to achieving the MISIP standard for clinical  
management of rape in humanitarian crises

Chen Reis  
SVRI Forum 2013

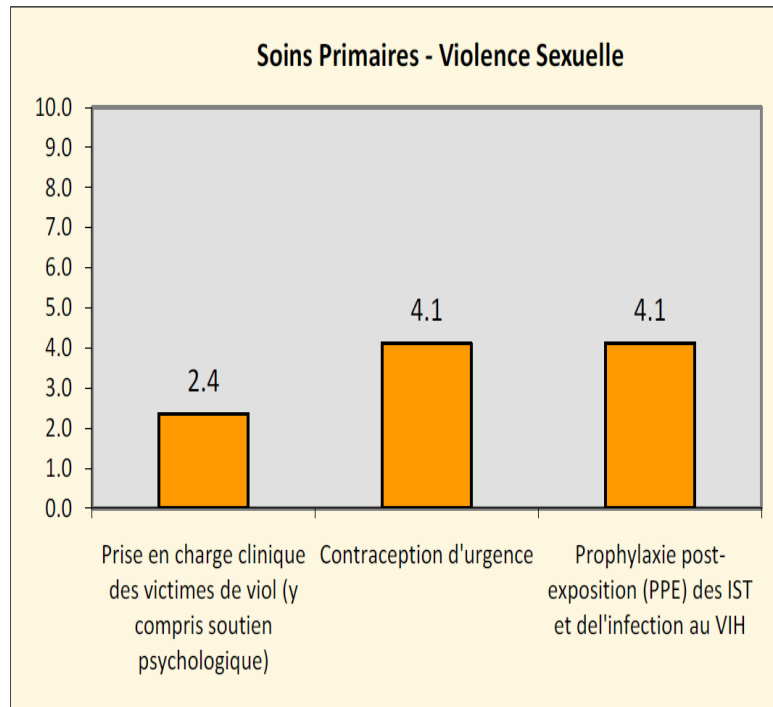

# Minimum Initial Services Package

1. coordination
2. Prevent and manage the consequences of sexual violence
3. Reduce HIV transmission
4. Prevent excess maternal and newborn morbidity and mortality
5. Plan for comprehensive RH services, integrated into primary health care (PHC) as the situation permits

# Health service availability

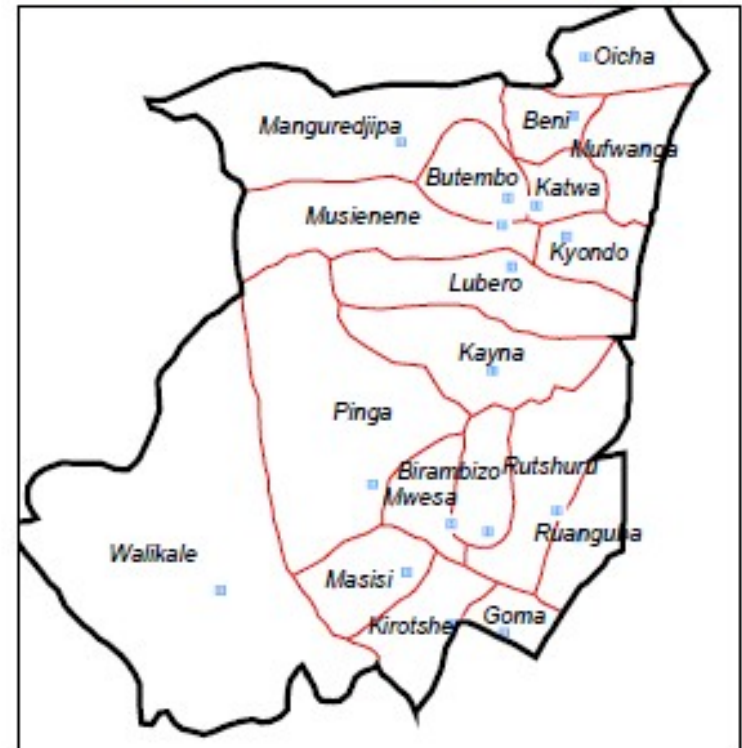

## M. En rapport avec la lutte contre les violences sexuelles

### Commentaires :

La prise en charge clinique des cas de violence sexuelle se fait dans 4 structures sur les 17 soit 24%. La cette prise en charge n'a pas été clairement définie par les responsables des structures. La contraception et la thérapie post ex positionnelle sont assurées dans 7 structures sur les 17 soit une couverture de 41% pour ces deux

## Zones de Santé / Health Zones

# Clinical Management of Rape

- psychological first aid
- physical examination
- EC and PEP
- treatment of infections and injuries
- medico-legal evidence collection
- referral

# Why isn't the standard met?

Resource  
gaps
